AP Physics 2 Course Contract

I, the undersigned, acknowledge each of the following points:

1. I understand that AP Physics is a very demanding and rigorous course. As such, I am willing to work a minimum of one hour per day outside of class on my AP Physics.
2. I understand that attendance is a very important factor in the successful completion of the AP Physics course and I plan to attend every class unless a serious reason keeps me away. I am also aware that every assignment is important and there will be no excused labs or assignments because of absences.
3. I will complete my required summer assignment and turn it in on the date that it is due in September.
4. I understand that laboratories are 25% of AP Physics and will complete each lab.
5. I understand that taking an Advanced Placement course will be looked at favorably by colleges if I do well in the course. This can help me to get into college and depending on my course grades and AP test results, this may even be accepted for credit.
6. I will study both by myself and with class study groups. I understand the importance of studying with other students, especially when working through difficult problems.
7. At the same time, I realize that personal integrity is highly valued in this course and that I will be on my honor to perform my work honestly at all times. I will not copy work from other students.
8. In spite of all of the demands of this course, I understand that it will also be fun and I will learn a lot. I feel that I am up to the challenge of AP Physics and I am prepared for this experience.

For the Parent/Guardian

I have read all of the course requirements and the contract and have discussed this with my child. I have also read through the summer assignment and understand that my child must complete the summer assignment before returning to school in September. Both my child and I understand that AP Physics is a demanding course, but can also be very rewarding. I am willing to support my child toward his/her success in AP Physics.
